Haircourses - Basic or Professional

Art of Style and Make-up offers two courses in hair styling. A 10-week basic course for all beginners and an extended course intended for hairdressers and former students in the basic education. The teaching takes place one evening a week and can easily be combined with work or other courses

10 weeks Haircourse

Here you get a comprehensive basic training that allows you to style hair professionally. Whether you dream of becoming a stylist or just want to refresh your skills, our 10-week hair course is a really good ballast for your further work in the industry.

In the course, we work professionally with hair styling, and you learn a lot about working creatively, coming up with new ideas and further developing your professional skills.

With a professional hair course, you get a lot of tools that you can use, whether you work as a professional makeup artist or stylist. In our hair course, you will learn face shapes and how to highlight the face shape when placing the hair filling at setups.

We also work with various hair products and tools, so that your styling gets the right, professional finish. One of the classic disciplines in hair styling and hair styling is bridal hair. Therefore, we have a strong focus on the techniques that underlie the setup of bridal hair. You will learn various braiding techniques, twists, curls, snake curls and much more that can form part of a beautiful and romantic bridal hair set.

In the course, you will also be taught historical hairstyles and learn how waves and crepe hair were the inspiration for hairstyles back in the 1940s. But of course, we also look ahead, and look at modern hair styling, the latest hairstyles and trends as well as men's styling. At the end of the course, we style models for a fashion show

The course is a good supplement to the Stylist and Makeup artist education. During the course you can expect that the following will be reviewed:

Face Shape

Where should the hair filling sit as well as preparation of the hair before setting up.

Products

Work with different hair products and use of curlers, curling irons, straighteners etc.

Bridal Hair

Romantic settings with braiding technique and twists, among others. Classic bridal hairstyles and new trends in bridal hairstyles. Party and gala hair. Larger or smaller setups with curls, snake curls, toupee-ing of the hair as well as the use of hawks and attachment of hairpins.

Historical hairstyles

Waves and crepe hair with setups and hairstyles from 1940s, among others.

Trend hairstyles

Up to date hair for women and men with inspiration from various fashion magazines as well as hairstyles for photography. Hair styling for larger and smaller fashion shows.
